Seattle Seahawks offense

Scouting report for the Bears · 2026 Week 8 · Bears at Seahawks, Mon Nov 2, 2026

Data through Week 7 (7 games). Only games before this week are used. Ranks are among all 32 teams.

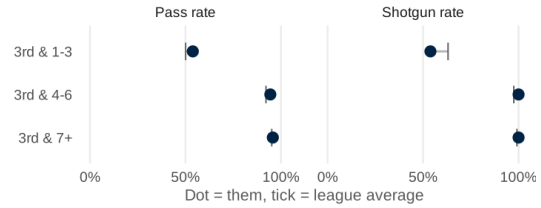

3 things to know

1. **Early downs:** 2nd-least efficient running game, -0.26 EPA per run (league avg -0.09). 145 plays
2. **2-minute:** 2nd-least efficient offense, -0.36 EPA per play (league avg +0.00). 58 plays

Early downs: run-first, runs more than the situation calls for

Metric	Value	NFL rank	League avg	Last season	Plays
Pass rate	53%	23rd	55%	52% (24th)	310
Pass rate over expected	-5 pts	26th	-1 pts	-6 pts (27th)	310
Shotgun rate	45%	28th	54%	42% (31st)	310
EPA per play	-0.07	24th	+0.01	+0.06 (9th)	310

3rd down: pass rates in line with the league at every distance

Distance	Pass rate	EPA/play	Plays
3rd & 1-3	54% (14th)	-0.24 (25th)	13*
3rd & 4-6	94% (16th)	+0.14 (13th)	18*
3rd & 7+	96% (18th)	+0.00 (17th)	47

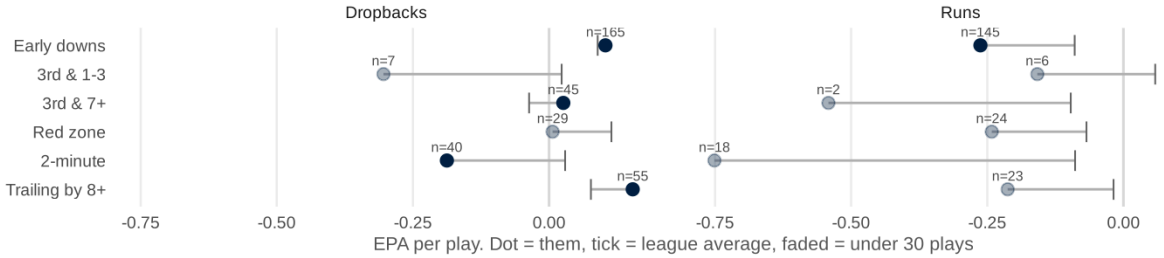

Red zone: balanced (55% pass rate)

Metric	Value	NFL rank	League avg	Last season	Plays
Pass rate	55%	17th	54%	49% (24th)	53
Pass rate over expected	-6 pts	19th	-4 pts	-10 pts (25th)	53
EPA per play	-0.11	27th	+0.03	-0.03 (21st)	53

Tendency shifts: no big changes in the last 4 games

Situation	Metric	Season	Last 4	Change	Plays (last 4)
Early downs	Pass rate over expected	-5 pts	-9 pts	-3 pts	181
Early downs	Shotgun rate	45%	48%	+3 pts	181
Early downs	EPA per play	-0.07	-0.15	-0.08	181
3rd & 1-3	Pass rate	54%	62%	+9 pts	8*
Red zone	Pass rate	55%	48%	-7 pts	21*
All neutral downs	EPA per play	-0.05	-0.10	-0.05	232

Most dangerous: passes when trailing by 8+ (+0.15 EPA per play vs. +0.08 league)

How to read this. Pass rate counts sacks and scrambles as passes. *Pass rate over expected* compares their pass rate with what an average team calls in the same down, distance, field position, score and time (nflverse xpass model). EPA = expected points added; above 0 is good for the offense. Early downs, 3rd down, red zone and "all neutral" use only plays when the offense's win probability was 5–95%. The 2-minute and trailing-by-8+ splits use every play. Numbers marked * are under 30 plays: treat them as a hint, not a tendency. Shift = last 4 games differ from the season by 5+ points (0.10 EPA) on 30+ plays. Data: nflverse play-by-play (nflfastR / nflreadr), openly licensed. Built by Chris Antosiewicz · source.
